

One of Epson's brightest and most technologically advanced projectors yet

As one of the brightest products in Epson's range, the EB-Z8355W suits the needs of the demanding rental market and is designed for use in environments such as e-cinemas and music venues or for companies holding conferences who need to hire in specialist equipment.

Bright - Its 8,500 lumens delivers clear and vivid images at WXGA resolution with ease. Epson's 3LCD technology ensures high-quality images with its equally high White and Colour Light Output for vivid, natural colours and deep blacks, even in daylight.

Lens provided - The projector offers first class adaptability, as it is compatible with all existing optional Epson lenses.

Flexible - The flexible installation angle caters for both front and rear projection systems. The WiFi connectivity combined with a wide lens shift range both vertically and horizontally make for easy integration into any environment. And tap into Epson's EasyMP software to deliver split screen functionality, multi-PC projection and stream videos via WiFi.

Technologically advanced - It offers Edge Blending for the very first time, stacking up to four projectors horizontally and two vertically.

High quality images - Epson's Super Resolution feature delivers a smooth, high-quality image, every time.

Immaculate images - The Point and Arc Correction features allow for uneven screens and the built-in test patterns handle image calibration with ease.
