EB-L200SW

120 / 53	LASER	WiFi® Miracast	2x HDMI
WXGA	16 W		3800 lm
2,500,000:1			

Ideal for delivering high-quality content to a large scalable screen size with versatile wireless or wired connectivity options

The EB-L200SW delivers superior-quality images and a host of additional features as standard to give users more for their money. Wall, ceiling or table top mounting options create flexible workspaces. The large display size means content can be viewed from every angle, and participants can share directly from their own devices, for the perfect collaborative experience.

With the EB-L200SW, users are no longer restricted to a single display size, with bright, large scalable options up to 120". Unlike flat-panel equivalents, there are no shadows, glare or blind spots, and the 3,800lm high-brightness laser light source can work when ambient lighting is also high. Multi-screen capability makes collaboration easy and intuitive, while a split-screen feature can show up to four inputs on one large display

The viewing experience is more immersive, with multiple connectivity options enhancing exceptional image and built-in speaker sound quality. By connecting an optional Epson document camera you can easily display live images of 3D objects with incredible detail that the whole room can see.

For the ultimate in engagement; wireless connectivity (including Screen Mirroring via Miracast) allows everyone to share content from their tablets, mobiles or laptops.

Sustainability is another strength, based on sustainable manufacturing, product usage and lifecycle.
